Healing Heat Any Day

PowerStrips™ are uniquely designed to provide temporary relief of minor aches and pains. Natural elements, such as capsaicin, germanium, and red ginseng are combined to help provide a safe, all-natural solution for your regular pain management needs. As an all-natural adhesive, safe for daily use, PowerStrips redirect the body's original heat and energy into the areas of the body to which PowerStrips are applied, amplifying relief and comfort.

POWERSTRIPS™ with CAPSAICIN

✓ WHERE DOES IT HURT?

Is your busy life and uncomfortable mattresses causing you to move a little slower these days? If you suffer from minor aches and pains, you're not alone. Frequent pain is a commonplace experience in the general population. Research shows that most people can think of at least one occasion in the past month, or even in the past week, when they had a body ache or experienced muscle soreness.

✓ ANCIENT WISDOM MEETS NEW TECHNOLOGY

PowerStrips™ utilize natural elements and energies to create a perfect pain-free environment for your body. This synergy allows extra heat from a pinch of natural capsaicin, and infrared energy from the body to be reflected back into the tissue where PowerStrips are applied, amplifying relief. Manufactured in a state-of-the art facility, PowerStrips harness the benefits of cutting-edge technologies and ancient herbal remedies to provide a safe, all-natural solution for your regular pain-management needs.

Germanium—A transparent element on the periodic table, germanium allows white light and heat to flow through it. When you apply PowerStrips™ to the skin, the heat that rises off the body goes in and through the germanium. That energy is then bent and redirected back toward the body. The heat is broken down into its component parts; the most important part is the long-wave heat. This long-wave heat is refracted back into the body, and it penetrates into the tissues to a depth of about ten centimeters. As long as you wear a PowerStrip, these bio-chemical processes and neurologic processes come together and create a warm, relieving environment.

HOW TO APPLY:

- Clean and dry affected area.
- Open pouch and remove strip.
- Remove paper backing.
- Apply strip directly to skin.

Do not apply on broken skin. Not designed to be worn for more than 48 hours.
